Summary

Full-Stack Developer with hands-on experience building and maintaining web applications using React.js, Next.js, Node.js, Laravel, PHP, and MongoDB. Experienced in developing responsive interfaces, integrating REST APIs, implementing authentication and backend business logic, and working across the full application stack. Built and deployed multiple full-stack projects, with a strong focus on clean architecture, practical problem-solving, and scalable web applications.

Skills

Frontend: React.js, Next.js, TypeScript, Tailwind CSS, Framer Motion

Backend: Node.js, Express.js, Laravel, PHP, REST APIs, JWT Authentication

Database: MongoDB, Mongoose, PostgreSQL (Neon)

Tools & Platforms: Git, GitHub, Postman, Vercel, Netlify, Vite

AI-Assisted Development: ChatGPT, Claude, Cursor, Codex, Antigravity

Experience

Laravel Intern | EverythingX

Feb 2026 – July 2026

- Developed and enhanced backend features using Laravel and PHP, including REST API development, request validation, database operations, and business logic.
- Integrated APIs into application workflows and worked with database operations to support application functionality.
- Contributed to maintaining and improving scalable backend architecture and application functionality.

React.js Developer Intern | Notionmind

Nov 2024 – Apr 2025

- Developed reusable React.js components and responsive user interfaces using Tailwind CSS.
- Integrated REST APIs and implemented frontend functionality using React Router.
- Contributed to maintaining a clean and reusable frontend architecture across application features.

Projects

Cinexium | Next.js, TypeScript, TMDB API, Neon, Pusher

[GitHub](#) | [Live](#)

- Built and deployed a full-stack movie and TV platform with Next.js and TypeScript, integrating TMDB APIs for discovery, search, movie details, cast, trailers, and entertainment data.
- Developed authentication, watchlists, collections, likes, user profiles, community groups, and real-time chat using Pusher, with persistent data stored in Neon.

Waypoint | Next.js, React, Capacitor, Geolocation, Push Notifications

[GitHub](#) | [Live](#)

- Built a location-aware task and reminder application using geofencing and background location tracking to detect user arrival and departure from saved locations.
- Implemented native push notifications and real-time leave/arrive alerts with Capacitor, enabling location-based reminders even when the application is not actively open.

Beatzy | Next.js, YouTube Player API, NeonDB

[GitHub](#) | [Live](#)

- Built a modern music streaming application with music discovery, playlist management, and integrated audio playback using the YouTube Player API and NeonDB.

Taskey | React.js, Laravel, PHP, Neon

[GitHub](#) | [Live](#)

- Built a full-stack task management application with authentication, REST API integration, task CRUD operations, and a responsive dashboard.

Education

Bachelor of Vocation in IT & IT Enabled Services

Silver Oak University, Ahmedabad | 2023–2026 | 8.48 CGPA

12th Standard (Commerce)

C.M. Vidhyalaya, Palitana | 2023 | 66.66%
